Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a process for the hydroformylation of olefins, classified in class 568, subclass 444.
- II. Claims 6-10, drawn to a cylindrical reactor, classified in class 422, subclass 194.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced using any known apparatus for use in gas/liquid processes, such as hydroformylations, and the apparatus as claimed can be used to practice another and materially different process. For example, U.S. Patent 6,838,061 to Berg et al teaches a cylindrical reactor akin to that which is claimed herein that can be employed in processes such as hydrogenations, oxidations, and aldol condensations.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with applicants' representative, Jason Voight on June 1, 2005 a provisional election was made with traverse to prosecute the invention of group I, claims 1-5. Affirmation of this election must be made by applicant in replying

Art Unit: 1621

to this Office action. Claims 6-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the instant claims, i.e., claims 1-5 are drawn to a hydroformylation process that is conducted in a vertical tall cylindrical reactor as described in the instant claims. The closest prior art of record fails to teach or fairly suggest a hydroformylation conducted in such a reactor.

This application is in condition for allowance except for the following formal matters:

Claims 6-10, drawn to a non-elected invention are still active and need to be cancelled.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
